## Meter Reading Entry Plus

### About MREplus™

MREplus™ Meter Reading Entry Plus software is designed specifically for Handheld Mobile Computers as a “No-Nonsense,” easy to use application to get your meter readings from your customer meters to your utility billing software.

### Ease-of-Use

MREplus™ was developed from the ground up with Ease-of-Use as top priority. From Loading or Unloading the reading data to entering the readings while in the field, MREplus™ streamlines the procedures for accomplishing these tasks without complicating your job.

### Ease-of-Interface

If you are currently using Utility Data Systems, Inc. UBSplus® as your utility billing software, MREplus™ interfaces directly. You select the accounts you wish to have read and click “Begin Output.” It’s that simple!

If you are using billing software from another software provider, MREplus™ interfaces with RTSplus™ Route Transfer Software. RTSplus™ can transfer reading files to and from virtually any billing software that has the capability of importing and exporting reading data.

### Find Out More...

For more information about MREplus™ and the Motorola Symbol 3000 Handheld Mobile Computer, please visit the MREplus™ webpage at:

Mobile Computer

### MREplus™ Features:

1. Intuitive, easy-to-understand menus.
2. Daylight Mode will darken the buttons so they are clearly seen in bright sunlight.
3. Extended comment allows free form comments to be entered.
4. Statistics Screen displays the number of accounts that have been read and unread along with the total number of accounts, and date/time.
5. Search for Accounts by Last Name, Service Address, Meter Number, and Unread Meters.
6. The “Found Meter” feature allows the meter reader to enter information about meters “found” on a particular route that may have been improperly documented.
7. Audible and visual High/Low Reading Warnings.
8. Previous Reading Displayed.
9. Each customer’s account is displayed automatically.
